

9. DOKENSIP WIRELESS BOAT SECURITY

The Dokensip 24/7 wireless alarm monitoring system allows remote viewing of a boat's status via a smartphone app or web support, alerting owners to any security breaches or mechanical/electrical issues via SMS, email or phone. Dokensip can control up to 16 sensors, providing information on vessel position, battery voltage, water in bilges, the presence of gas or smoke, movement inside the cabin, shorepower status, light and air-conditioning operation, and more. RRP from \$1595 (subscription fees apply after the first year). dokensip.com.au
